

A photograph of a modern control room. The room features a long, light-colored desk with several computer monitors. On the left, a black ergonomic office chair is positioned. The desk is equipped with multiple monitors, some displaying data, and various office supplies like a telephone and papers. The room has a clean, professional appearance with a dark carpet and recessed ceiling lights.

# Control Room Solutions for WATER TREATMENT AND WASTEWATER UTILITIES

WHERE DESIGN MEETS TECHNOLOGY

Safe • Productive • Comfortable  
Centralized Operations Control Room Spaces

**Adaptaspace** designs & manufactures a full range of 24/7 Process Control console systems in standard and fully custom configurations, responding to the evolving needs of today's Water Treatment and Wastewater facilities.

Our **Human-Centred** design approach applies best practises and knowledge of Ergonomics and Human Factors to ensure our workstation solutions contribute toward the creation of an optimized work environment, promoting operator attentiveness, wellness, and job satisfaction to maximize operational efficiency and performance.

### Product Offerings

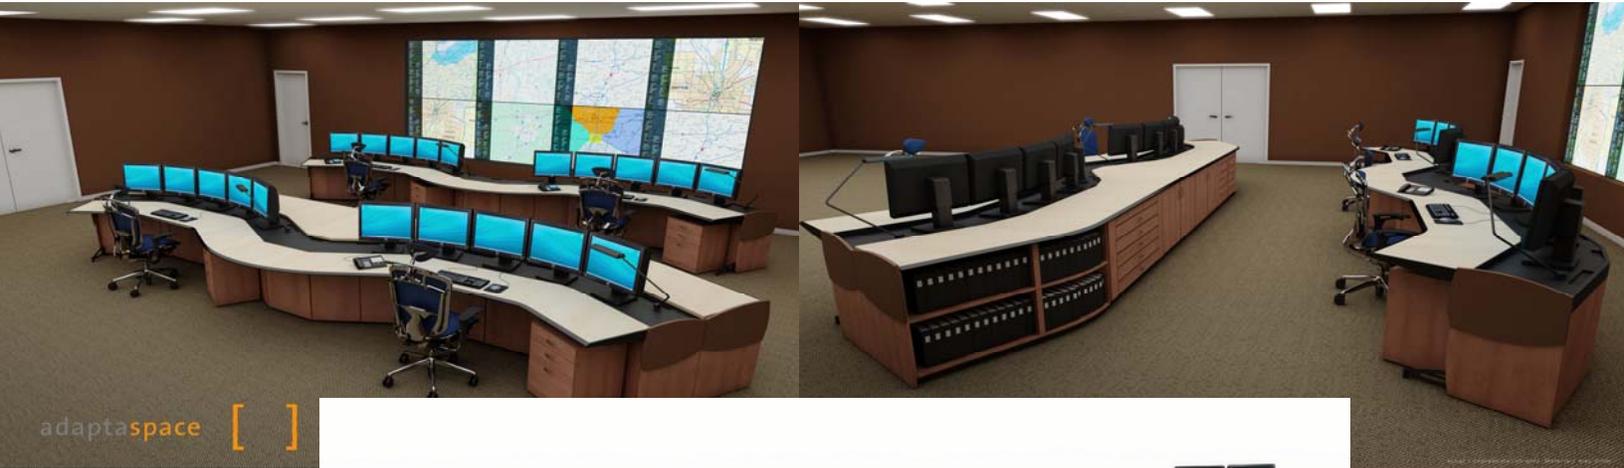

- Custom Console Workstations
- Panel Wall Systems
- Rear Beam and Slat Wall Equipment Mounting Systems
- Display Arms & Mounts
- Task Lighting Solutions
- Personal Environment Controls
- Custom Cabinetry for Personal Storage; Printer Cabinets; Binder & Reference Material Storage; and more...

Adaptaspace's Water Utility console solutions are based on our **PROCESS** Console System custom configured for each unique water treatment or wastewater facility.

Every project is designed to meet the specific equipment requirements and layout constraints of each control room, yet all consoles incorporate the following common elements:

- human factors requirements, for increased comfort and reduced physical stress;
- equipment and accessory mounting flexibility, to satisfy the needs of each user;
- extensive cable management, for easy installation and access;
- product durability, for 24/7 operation backed by an industry leading lifetime warranty;
- room layout flexibility, to cater for any space constraint;
- modularity, to allow future equipment and room layout re-configurations;
- attractive aesthetics, to reflect corporate identity and image.

The **PROCESS** Console has been tested to exceed ANSI/BIFMA Standard X5.5-2008 and is compliant with ergonomic standards established by ADA; ANSI; CSA; OSHA; BIFMA; UL / CSA

DISCLAIMER: ARTIST'S CONCEPTUAL RENDERING.

**Adaptaspace** has a proven history responding to the unique design and planning demands of process control and monitoring work-environments by providing collaborative design support for room layout design, work flow analysis, console development, and user and equipment requirements.

Standard project support services include:

- Planning Support— concepts, budgeting
- Requirements Analysis — criteria & constraints, key success factors
- Detailed Drawings and Specifications
- Conceptual Design Development — renderings, mock-up consoles
- Delivery & Installation Planning

Our project experience includes work with some of the most prominent Water Utilities in North America.
